

Preparing for Potential Infection in West Virginia Communities

Since February 2020, the West Virginia Department of Health and Human Resources, Bureau for Public Health has been following an increase in the number of confirmed cases of COVID-19 in the U.S. The Bureau for Public Health monitors Centers for Disease Control and Prevention (CDC) updates, hospital admissions, and other data to determine the potential risk to citizens in West Virginia from the virus.

COMMON SYMPTOMS OF COVID-19

- Fever
- Cough
- Shortness of Breath

PERSON-TO-PERSON TRANSMISSION

- Occurs via small droplets from the nose or mouth of the infected person when they cough, sneeze, or exhale.
- Maintain 2 meter (6 ft) distance between yourself and anyone coughing or sneezing.
- Stay home if you feel sick. If you have a fever, cough and difficulty breathing, seek medical attention and call in advance.

PREVENTION

- Isolating sick and diagnosed individuals.
- Encourage proper handwashing.
- Cleaning and sanitizing surfaces.
- Provide education about COVID-19.
- Discourage sharing food, drinks, etc.

CDC GUIDANCE FOR NON-HEALTHCARE FACILITY ENVIRONMENTAL CLEANING

- Routinely clean all frequently touched surfaces in the workplace, such as workstations, countertops, and doorknobs. Use the cleaning agents that are normally used in these areas and follow the directions on the label.
- Provide disposable wipes so that commonly used surfaces (for example, doorknobs, keyboards, remote controls, desks) can be wiped down by employees before each use.
- The American Chemistry Council Center for Biocide Chemistries has developed a list of cleaning products that are expected to be effective against the virus that causes COVID-19.

COVID-19 GUIDANCE

- Post signs at the entrance instructing visitors not to visit if they have symptoms of respiratory infection.
- Ensure sick leave policies allow employees to stay home if they have symptoms of respiratory infection.
- Assess residents' symptoms of respiratory infection upon admission to the facility and implement appropriate infection prevention practices for incoming symptomatic residents.
- Keep residents and employees informed.
- Monitor residents and employees for fever or respiratory symptoms.
- Support hand and respiratory hygiene, as well as cough etiquette by residents, visitors, and employees.
- Identify dedicated employees to care for COVID-19 patients and provide infection control training.
- Provide the correct supplies to ensure easy and correct use of personal protective equipment (PPE).
